Email: allanchinambu666@gmail.com

1.0 INTRODUCTION

The Government of the Republic of Zambia is currently implementing the Eighth National Development Plan in which a key objective is to achieve strong economic growth as a prerequisite for poverty reduction through sustainable utilization of natural resources. The growth is expected from Agriculture, Tourism, Manufacturing and Mining. In all these sectors, the engine for growth is through increased productivity, sustainable use of natural resources, value adding and increased competitiveness at local, regional and global levels. The Ministries of Agriculture, Green economy and Environment and The Ministry of Small and Medium Enterprise Development are currently implementing policies aimed at promoting sustainable agricultural production and sustainable use of natural resources in order to ensure food ,income and nutrition security, creation of employment opportunities, wealth creation, reduction in poverty levels and environmental protection.

In accordance with the Governments policies, the Cashew Growers Association of Zambia (CGAZ), and the above Ministries have jointly formed a partnership to empower local communities to create wealth, reduce poverty and promote environmental protection through the development of a sustainable and value-added cashew commodity chain. Cashew production has the potential to create significant economic, environmental and social impact in the uplands, which are heavily degraded and covered with a mantle of the infertile Kalahari sands. The Kalahari sands are ideal for good growth and yield of Cashew trees. The evergreen

cashew trees play an important role in rehabilitating the heavily degraded pieces of land, while providing a sustainable and alternative source of livelihood.

The Cashew Growers Association of Zambia (CGAZ) was established in 2007 under the laws of Zambia (Societies Act) with certificate of registration No. ORS/101/06/176 and has its registered office at Mongu in the Western Province of the Republic of Zambia.

CGAZ is a non partisan and non profit making organisation that derives its membership from Cashew producers and other stakeholders engaged in Agricultural production, Processing and marketing of Agricultural produce. The Association has the mandate to protect the interests of its members as producers of agricultural products.

2.0 MISSION/ OBJECTIVES/ GOALS

To enhance the adaptive capacity and livelihood systems of vulnerable communities through environmental protection, promoting sustainable use of natural resources and improving the income generation efficiency/ effectiveness of the targeted communities. The main thrust of the project is to build the capacity of the rural communities thus enabling them to actively and meaningfully participate in the environmental protection, wealth creation and poverty reduction at national, regional and community levels.

The core objective of CGAZ is to rehabilitate the degraded pieces land in the affected communities through planting and rejuvenating cashew trees and to build and strengthen capacities of vulnerable communities thereby enabling them to deal with environmental issues and manage cashew orchards in a productive, profitable and sustainable manner.

3.0 MEMBERSHIP BASE

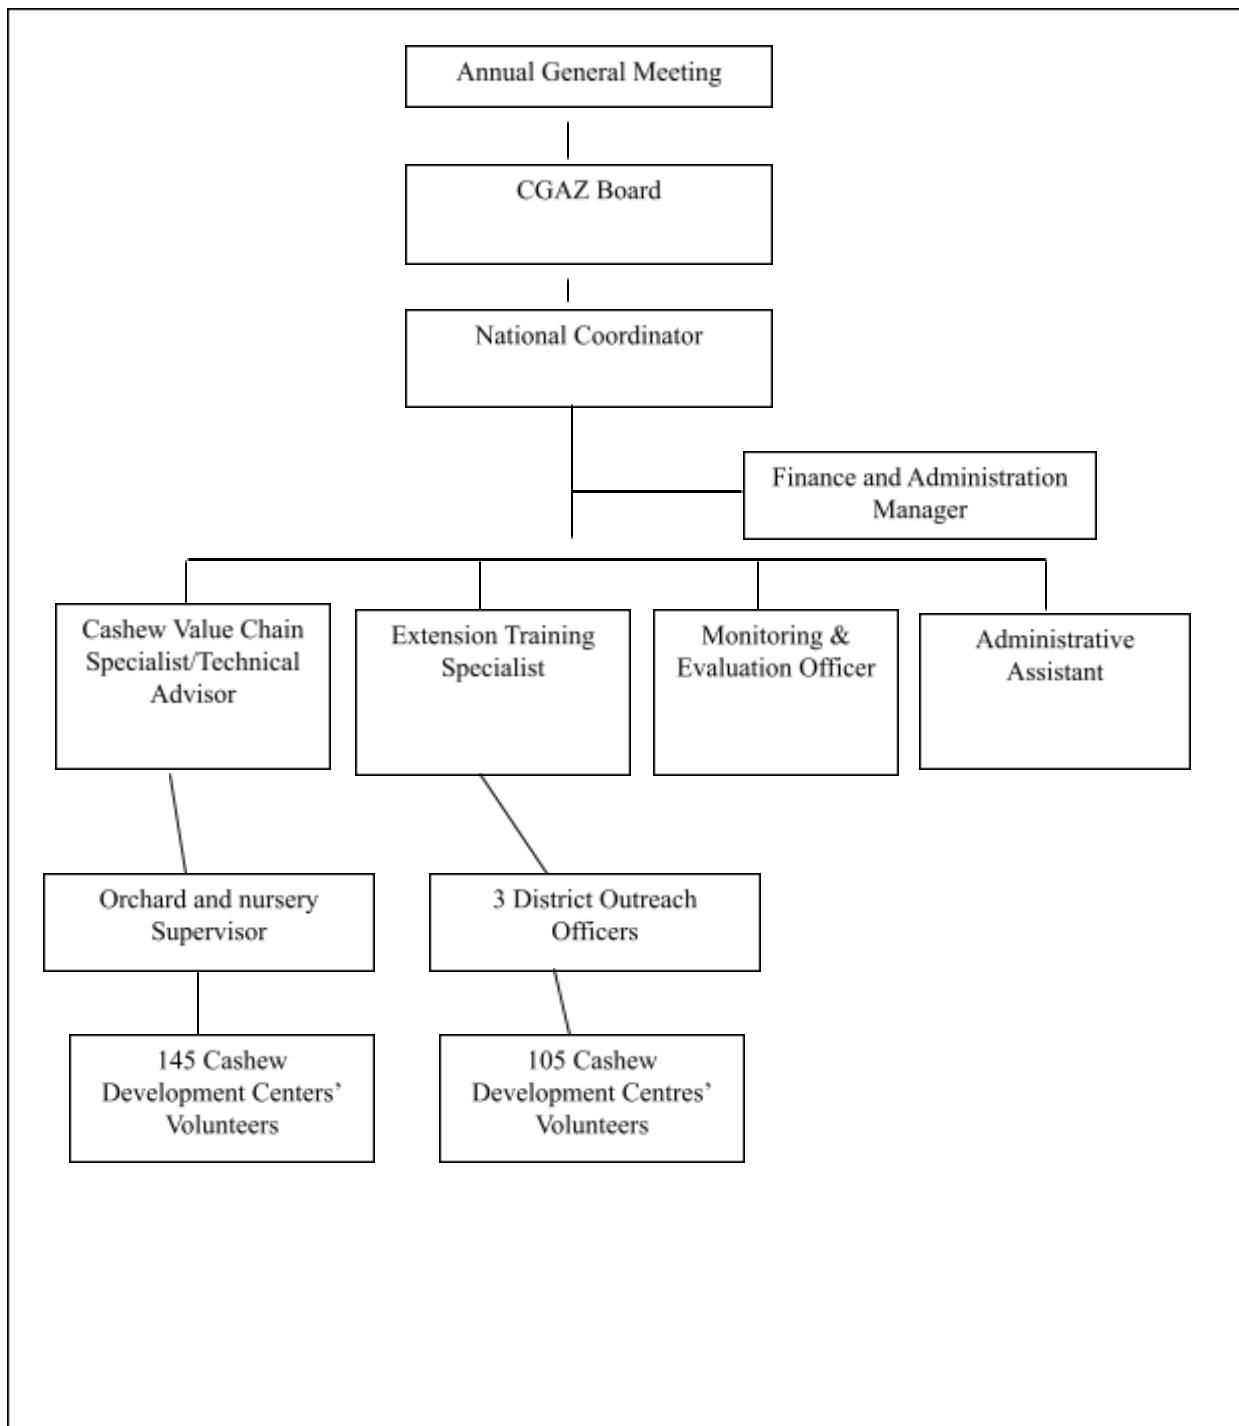

CGAZ derives its strength from the general membership that has steadily grown over the last few years and currently stands at a total of 22,490 belonging to 145 Cashew Development Centers (CDC) in the Western Province as indicated in the table below:

Former Minister of Finance and National Planning Hon. Alexander Chikwanda visits the CGAZ Cashew Nursery at Mabumbu Cashew plantation in Mongu

Former Finance and National Planning Minister Alexander Chikwanda visits the CGAZ Cashew Nursery in Mongu. Looking on is Western Province Permanent secretary- Emmanuel Mwamba.

The Ministry of Agriculture and Livestock has since given the Cashew Growers Association of Zambia an opportunity to propose a policy statement to be included in the National Agricultural Policy. The proposed policy statement will provide an opportunity for CGAZ to establish the legal and regulatory framework that will help to promote, control and regulate all matters in the cashew industry in an efficient, effective and fair manner.

Below Agriculture and Livestock Permanent Secretary Dr. David Shamulenge arrives to officiate at the National Cashew Consultative forum organised by CGAZ and ACF at Sandys Creations in Lusaka.

Participants at the National Cashew Consultative forum on the National Cashew Development Strategy (NCDS) organised by CGAZ and the Agricultural Consultative forum (ACF).

The Ministry of Lands Environment and Natural Resources has under the work plan included cashew as one of the tree species to be grown under the National Tree Planting Program (NTPP).

8.0 TRAINING/ CAPACITY BUILDING

SENSITIZATION TRAINING WORKSHOP FOR CAMP EXTENSION OFFICERS ON CASHEW PRODUCTION AND ECONOMIC BENEFITS

The CGAZ and Ministry of Agriculture and Livestock conducted training workshops for Camp Extension Officers was held at Namushakendi Farm Training Institute from 6th - 9th November, 2012 in Mongu district. The sensitization training workshop was organized by the Ministry of Agricultural and Livestock and Cashew Growers Association of Zambia. Eleven (11) Camp Extension Officers

two (2) district staffs and 7 senior Agricultural staffs attended the sensitization training workshop. The meeting was formally opened by Dr. Simainga Simainga (Provincial Agricultural Coordinator). The main objective of the workshop was to train and sensitize camp extension officers on cashew production and its economic and environmental benefits as an alternative source of livelihood for the vulnerable communities along the cashew hub. The Training Workshop had a total number of four facilitators and these were Mr. Mwiya Mukungu (PAO), Mr. Moses Shimbilimbili (National Coordinator CGAZ), Mr Matauka Kumoyo (SAO) and Mr. Mutale Chrisantus (Senior Agricultural Research Officer)
